

Blackjack Flowchart + Paragraph

Peter Stegun 7-8B

Paragraph

I programmed a game of blackjack. I have simplified my game so that aces are only equal to the value of 1 instead of its traditional value of 1 or 11. I also did not give the player 2 cards right off the bat as you are supposed to do in traditional blackjack due to this being a more simplified version I have created. The code also occasionally shows an error even though there is no problem with the code itself. Besides that the game works like regular blackjack.
